Comments: Part C: Catheterization Services Utilization, 1B. Room Details: Detailed catheterization procedural volume totals by room currently unavailable. Part C: Catheterization Services Utilization, 2A. Therapeutic Cardiac Catheterizations: GMC participated in and completed the elective and primary PCI Development Program through Corazon and on March 1, 2011, GMC performed its first therapeutic cardiac catheterization procedure, which is outside the timeframe of this survey. Part C: Catheterization Services Utilization, 2E Cardiac Catheterization Sessions: Each

patient visit to the cardiac catheterization lab was counted as one session even if more than one specific procedure or cardiac catheterization study was performed. Part C: Catheterization Services Utilization, 3A. Other Procedure Performed During Cardiac Catheterization Session and 3B. Non-Cardiac Catheterization in Cardiac Catheterization Facilities: Select non-cardiac catheterization procedures previously performed in the cardiac catheterization labs were relocated to other procedural areas located within the hospital. Part D: Charges, 1. Average Total Charge and Average Actual Reimbursement: Charge, case and reimbursement data provided for patients with cardiac catheterization as principal procedure. The average charge is based on all charges, not just cardiac catheterization charges. The Cardiac Catheterization Services Survey Instructions provided MS-DRG equivalents for DRGs that are different than the assumptions defined by GMC in the 2009 survey. This change in the DRG to MSDRG crosswalk results in a variance in volumes when comparing the two survey methodologies. Part D: Charges, 3. Total Charges and Actual Reimbursement for Cardiac Catheterization Services: Charge and reimbursement data represents only those charges for services within the cardiac catheterization lab. Part D: Charges, 4. Total Uncompensated Charges for Cardiac Catheterization Services: Total charge data represents total charges net actual reimbursement for the entire stay for patients receiving cardiac catheterization services. Part D: Charges, 5. Adjusted Gross Revenue for Cardiac Catheterization Services: Revenue Data represents total charges for the entire stay for patients receiving cardiac catheterization services. Part D: Charges, 6. Primary Payment Source: Total charges represent charges for the entire stay and not exclusively the cardiac catheterization portion of the encounter. Slight variations in dollar amounts for indigent and charity care patients compared to reported total uncompensated charges is a result of minor variances in methodologies for calculating the data within automated financial systems. Part E: Peer Review, JCAHO Accreditation, OHS Referrals and Treatment Complications, 4. OHSS Referrals: Referral numbers include direct transfers from both the cardiac catheterization lab to an open heart surgical services provider as well as direct transfers from the emergency department for AMI and Chest Pain to an open heart surgical services provider. Referrals exclude transfers from an inpatient setting to an open heart surgical services provider. In addition to the facilities listed, there were 2 direct transfers to Atlanta Medical Center in CY2010.
