Comments: Part C, Question 2E-Volumes increased significantly from prior year due to new clarifying sentence in Survey instructions that notes "If therapeutic and diagnostic cardiac catheterizations are performed during the same session, report both types of cardiac catheterization". In prior years, sessions were viewed as a visit to the lab instead of treatment/procedure sessions. Part C, Question 4-98 patients did not provide ethnicity information. These patients were added to the most common ethnicity (white) in the survey. Part D 3-5)Charges, reimbursement, uncompensated charges and adjusted gross revenue for those patients who had both Open Heart and Cardiac Catheterization services are allocated by applying the proportion of cath lab-to-combined cardiac cath/open heart charges against total charges. Part F, Question 1-16 patients did not give county of origin information. These patients were added to the most common county (Fulton) in the survey.
