Comments: Comparison of FY11 Cath Survey vs FY12 Cath Survey... For Part E, Question 4, I noticed that on the FY11 Cath lab Survey there were a large number of Open Heart referrals as compared to FY12. The FY11 had reported the number of patients transferred to other hospitals, not the actual number of Open Heart referrals. In other words, over the course of FY12 Piedmont Mountainside transferred 32 patients to other entities, only 6 of them were for Open Heart, the other 26 were transferred for stent placement.
