Comments: Comments: Part C: Catheterization Services Utilization, 1B. Room Details: Detailed catheterization procedural volume totals by room currently unavailable. Part C: Catheterization Services, 2E. Cardiac Catheterization Sessions: A unique session is reported for each therapeutic procedure. Therefore, a patient receiving a diagnostic catheterization and a therapeutic catheterization will be reported as two sessions on this chart. Part D: Charges, 1. Average Total Charge and Average Actual Reimbursement: Charge, case, and reimbursement data provided for patients with cardiac catheterization or PTCA as principal procedure. The average charge is based on all charges, not just cardiac catheterization or PTCA charges. Part D: Charges, 3. Total Charges and Actual Reimbursement for Cardiac Catheterization Services: Charge and reimbursement data represents only those charges for services within the cardiac catheterization lab. Reimbursement is estimated based on the reimbursement to charge ratio for the total patient stay for those patients receiving cardiac catheterization services. Part D: Charges, 4. Total Uncompensated Charges for Cardiac Catheterization Services: Total charge data represents total charges net actual reimbursement for the entire stay for patients receiving cardiac catheterization services. Part D: Charges, 5. Adjusted Gross Revenue for Cardiac Catheterization Services: Revenue data represents total charges for the entire stay for patients receiving cardiac catheterization services. Part D: Charges, 6. Primary Payment Source: Total charges represent charges for the entire stay and not exclusively the cardiac catheterization portion of the encounter. Minor variations in dollar amounts for indigent and charity care patients compared to reported total uncompensated charges is a result of variances in methodologies for calculating the data within automated financial systems. Part E: Peer Review, JCAHO Accreditation, OHS Referrals and Treatment Complications, 4. OHSS Referrals: Referral numbers include direct transfers from both the cardiac catheterization lab to an open heart surgical service provider as well as direct transfers from the emergency department for AMI and Chest Pain to an open heart services provider. Referrals exclude transfers from an inpatient setting to an open heart surgical services provider.
