Georgia Minority Health Advisory Council Addendum

Because of Georgia's racial and ethnic diversity, and a dramatic increase in segments of the population with Limited English Proficiency, the Georgia Minority Health Advisory Council is working with the Department of Community Health to assess our health systems' ability to provide Culturally and Linguistically Appropriate Services (CLAS) to all segments of our population. We appreciate your willingness to provide information on the following questions:

1. Do you have paid medical interpreters on staff? (Check the box, if yes.)

If you checked yes, how many? (FTE's)

What languages do they interpret?

2. When a paid medical interpreter is not available for a limited-English proficiency patient, what alternative mechanisms do you use to assure the provision of Linguistically Appropriate Services? (Check all that apply)

Bilingual Hospital Staff Member

Bilingual Member of Patient's Family

Community Volunteer Interpreter

Telephone Interpreter Service

Refer Patient to Outside Agency

Other (please describe):

3. Please complete the following grid to show the proportion of patients you serve who prefer speaking various languages (name the 3 most common non-English languages spoken.)

Top 3 most common non-English languages spoken by your patients	Percent of patients for whom this is their preferred language	# of physicians on staff who speak this language	# of nurses on staff who speak this language	# of other employed staff who speak this language
Spanish	0.47	3	0	0
French	0.02	0	0	0
Arabic/Sign	0.01	0	0	0

Language/Chinese

4. What **training** have you provided to your staff to assure cultural competency and the provision of **Culturally and Linguistically Appropriate Services (CLAS)** to your patients?

Healthstreams (contracted education on line) is provided throughout the system of hospitals (BCH,

GGH, JDA & MCH). Annual updates are based on changing needs and is provided to staff on culturally & diverse populations that they may encounter. LodgeNet & Exitcare software has been added to the nursing component for individually assigned patient education on diagnostic education needs, advance directives and others. At the time of discharge Exitcare software allows the nursing staff to give the patient information to take home concerning their special needs in hardcopy in both English & Spanish.

5. What is the most urgent tool or resource you need in order to increase your ability to provide **Culturally and Linguistically Appropriate Services (CLAS) to your patients?**

International icons such as Mens & Womens bathroom are used throughout the system. There are no campus maps (hospital, out building services/departments, physician offices) in English or Spanish that can be provided in hard copy or on the web to patient/visitors. Directional signage is in English; if a patient/visitor was to enter on the East, West or South and did not speak English there could be a barrier. The most urgent tool needed is a software link that allows direct access (on the C.O.W.) for staff to immediately access the interpreter professional. Immediate access would limit errors and lessen LOS for the non-English speaking patient.

6. In what languages are the signs written that direct patients within your facility?

1. English

2. Brail

3.

4.

7. If an uninsured patient visits your emergency department, is there a community health center, federally-qualified health center, free clinic, or other reduced-fee safety net clinic nearby to which you could refer that patient in order to provide him or her an affordable primary care medical home regardless of ability to pay? (Check the box, if yes)

If you checked yes, what is the name and location of that health care center or clinic?

Thomas County Health Department, Hancock Human Service Center, 484 Smith Ave., Thomasville, Georgia and Primary Care of Southwest Georgia, 440 Smith Ave., Thomasville, Georgia
