Comments:

Part C, Question 4) 19 patients did not provide ethnicity information. These patients are added to the most common ethnicity (White) in the survey. Part D, Questions 3-5) Charges, reimbursement, uncompensated charges, and adjusted gross revenue for those patients who had both Open Heart and Cardiac Catheterization services are allocated by applying the proportion of open heart-to-combined cardiac cath/open heart charges against total charges. Note: Several questions on the survey request information for Cardiac Catheterization services, mostly likely by error. In their place we provided Open Heart Surgery information.
