Comments:

Part C: The number of operations reported in Q1 and Q2 total 464. This is seventy (70) more than the patients/operations reported in Part C, Q4 and Q5; Part D, Q2; and Part F (394). This is because (i) the latter group is 'open' patients only; and (ii) there were also seventy (70) patients who had coronary bypass plus valves, aortic valve replacements, and/or mitral valve replacements during the same operation and were reported on both lines in Part C, Q1. Part D, Q1 through Q5: Total patient charges were used in all of these calculations. Part D, Q4: To prevent reporting a number that is constantly changing as patients get qualified for charity status subsequent to the discharge date, SJH includes all charity/indigent write offs on open heart patients that took place in calendar year 2012 regardless of patient discharge date.
